Summary

Full-stack engineer with 4+ years at a global investment bank, building data-intensive financial platforms across trading, reporting, and client services. Backend-leaning across Java, Golang, and Spring Boot, with strong frontend work in React and TypeScript — having shipped both core APIs and complex UI for production platforms. Eager to apply engineering rigor to AI and data science problems in financial markets.

Education

Master of Computer Applications

Sardar Patel Institute of Technology, Mumbai

2019 – 2022

CGPA: 9.6/10.0

Bachelor of Computer Applications

Institute of Business Science and Research, Navi Mumbai

2016 – 2019

Grade: O (Outstanding)

Professional Experience

Technology Associate · Deutsche Bank

July 2022 – Present

- Lead full-stack development on dbCIS (Cash Investment Service), Deutsche Bank's corporate liquidity-management platform — Money Market Funds trade workflows, approvals, reporting, and client experience
- Architected and shipped scalable backend services on GCP with Kafka-based messaging, structured logging, and cloud-native infrastructure supporting high-volume financial transactions
- Built data pipelines and an async reporting engine across multiple report types and export formats, significantly reducing generation time through caching, parallel processing, and SQL optimization
- Designed access-control and approval frameworks for trade lifecycle management, with reusable patterns adopted across internal corporate banking platforms
- Built complex UI in React/TypeScript including advanced filtering and search, multi-step approval workflows, and a reusable design system used across portals
- Earlier: shipped experience-layer banking APIs (FX, payments, account validation, cash investments) with full CI/CD, IaC, and integration test coverage; built shared libraries (data masking, structured logging) used across the API portfolio

Trainee Analyst · Publicis Media

January 2022 – June 2022

- Developed backend APIs using .NET and integrated frontend components for enterprise data applications
- Collaborated with cross-functional teams to deliver data-driven solutions supporting business intelligence and reporting

Projects

- Portfolio of personal projects spanning backend services, web applications, and tooling, available at ayush-sah.github.io
- Actively exploring applied ML and data analysis on public financial datasets using Python, Pandas, and Scikit-learn

Achievements

- Received 2 Beacon Awards (Deutsche Bank's internal engineering excellence recognition) for critical production issue resolution and consistent defect management
- Finalist in Deutsche Bank's Innovation World Cup (1 of 6 finalists from 16,000 employees) for a financial literacy platform solution
- Led hackathon team to Top 2 finalist position in India Finals and division finals placement
- Completed DB Cloud Engineering Sprint with Distinction certification

Technical Skills

Languages: Java, Golang (Gin), TypeScript, JavaScript, Python, SQL

Backend: Spring Boot, REST APIs, Microservices, Kafka, gRPC, ETL workflows

Frontend: React, Next.js, Redux, TailwindCSS, MUI, Design Systems, Figma-to-code

Cloud & DevOps: GCP, Docker, Kubernetes, CI/CD, IaC, Webpack/Vite

Data & Testing: Pandas, NumPy, Scikit-learn, SQL/NoSQL, Karate, Cypress, Unit/Integration Testing
