Education

Master of Computer Applications

2019 – 2022

Sardar Patel Institute of Technology, Mumbai

CGPA: 9.6/10.0

Bachelor of Computer Applications

2016 – 2019

Institute of Business Science and Research, Navi Mumbai

Grade: O (Outstanding)

Professional Experience

Technology Assosicate · Deutsche Bank

July 2022 – Present

- Led backend development for enterprise trading platform, architecting core functionalities including trade workflows, approval mechanisms, fund discovery, and comprehensive reporting systems
- Designed and implemented scalable microservices architecture with standardized health monitoring, distributed messaging integration, and cloud-native infrastructure supporting high-volume financial transactions
- Engineered security enhancements addressing critical vulnerabilities across authentication, session management, and data protection layers, implementing configurable access control frameworks adopted organization-wide
- Developed asynchronous report generation engine with significant performance optimizations, reducing execution time by 90% through efficient caching and parallel processing strategies
- Built client onboarding automation system with lifecycle management, multi-format notifications, and streamlined workflows eliminating manual intervention and reducing operational friction
- Architected multi-tenancy solution enabling horizontal business scaling with strict data isolation, resumable user journeys, and seamless tenant switching capabilities
- Delivered experience layer APIs for foreign exchange, payment collection, account validation, and investment services with complete CI/CD integration and infrastructure provisioning
- Established platform-wide standards for structured logging, data masking, and API development through reusable frameworks and archetype templates accelerating delivery timelines
- Assumed additional responsibility for automation test suite development, creating comprehensive integration testing frameworks ensuring quality and functionality across services

Trainee Analyst · Publicis Media

January 2022 – June 2022

- Developed backend APIs using .NET framework and implemented frontend integration for enterprise applications
- Collaborated with cross-functional teams to design and deliver data-driven solutions supporting business intelligence and reporting requirements

Achievements

- Received 2 Beacon Awards for critical production issue resolution and consistent defect management excellence
- Finalist in Innovation World Cup (1 of 6 finalists selected from 16,000 employees) for financial literacy platform solution
- Led hackathon team to Top 2 finalist position in India Finals and division finals placement
- Completed DB Cloud Engineering Sprint with Distinction certification
- Awarded Student of the Year 2019 for academic excellence and leadership

Technical Skills

Languages: Golang (Gin), Java, JavaScript, TypeScript, SQL, Python

Backend: Spring Boot, REST APIs, Microservices Architecture, Kafka, gRPC

Frontend: React, HTML, CSS, Design Systems

Cloud & DevOps: GCP, CI/CD Pipelines, Docker, Kubernetes, Infrastructure as Code

Testing: Karate Framework, Integration Testing, Unit Testing, Automation Testing

Security: Authentication, Authorization, Data Masking, Vulnerability Assessment

Other: API Gateway Management, Agile Methodologies, System Design, Technical Documentation
